

Artificial Intelligence in Business

Potentials and limits of AI for sustainable business success in the digital age

Seminar objective

In the AI seminar, participants acquire comprehensive knowledge about the use of artificial intelligence in the company and learn how to use the potential of AI for sustainable business success. The participants should understand the basics and possible uses of AI for the company and be able to identify the requirements and opportunities in connection with AI. They should also be able to develop and implement AI strategies to ensure long-term success. Practical tips and methods for implementing AI measures as well as monitoring and evaluating successes serve as basic building blocks of the seminar course. Finally, participants will deepen their knowledge of AI-relevant topics such as machine learning, data analytics and automation.
